EDUCATION

MKSSS Cummins College of Engineering for Women, Pune

2024–2027 | B.E. in Information Technology
CGPA: 8.82

Government Polytechnic Khamgaon

2021–2024 | Diploma in Computer Engineering
Percentage: 94.63%

St. Ann's English Medium School, Akola

2021 | SSC – Maharashtra State Board
Percentage: 93.80%

TECHNICAL SKILLS

Languages: Java, Python, SQL

Frameworks & Technologies: Spring Boot, Flask, REST APIs

Databases: MySQL, MongoDB

Developer Tools: Git, GitHub, Docker, Postman, Jira, Power BI

Core CS Fundamentals: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Distributed Systems

CERTIFICATIONS

• Blockchain and its Applications – NPTEL

• Python Foundation Certification – Infosys

• Certificate of Merit – MSBTE State Level Technical Paper Presentation

EXPERIENCE

Business Intelligence Intern

SLB (Schlumberger) | Jul 2026 – Present | Pune, India

• Analyzed Power BI reports to trace end-to-end data lineage, identify upstream sources, and document source-to-report dependencies for enterprise data migration.

• Reconfigured Power BI report data connections during migration, troubleshot connectivity issues, and coordinated with team members to validate report functionality.

• Worked with Power BI and Azure data workflows to support data integration, migration, and enterprise reporting infrastructure.

PROJECTS

CodeSync: Real-Time Collaborative Code Editor

React, TypeScript, Node.js, WebSockets, CRDT, Docker | Jul 2026

• Engineered a real-time collaborative editor using WebSockets and CRDTs, designed for 50+ concurrent users, sub-100 ms synchronization, and conflict-free editing.

• Developed a Docker-based code execution engine with resource isolation and timeouts, targeting 99% successful execution of valid test submissions.

SentinelMCP: Secure AI Tool Execution Platform

Java, Spring Boot, MCP, PostgreSQL, Docker | Apr 2026

• Architected a secure MCP server with role-based access control, input validation, and tool-level authorization to prevent unauthorized execution.

• Implemented PostgreSQL transactions, concurrency controls, and audit logs, with stress-test targets of 100+ concurrent requests and consistent database updates.

Quantum Paradox: Face Deduplication

Python, FastAPI, OpenCV, ONNX, Pinecone | Jan 2026

• Developed a face recognition pipeline using OpenCV YuNet and SFace (ONNX), targeting 95%+ duplicate-detection precision on a labeled evaluation set.

• Built a Pinecone vector similarity search system with separate individual and business namespaces, targeting sub-200 ms retrieval latency.
